

GUILFORD COLLEGE UNITED METHODIST CHURCH GREENSBORO, NC

The Guilford College UMC project involved the design of a new 600 seat sanctuary, choir room and associated support space. The sanctuary was laid out in a conveival arrangement with a pulpit center chancel. Designed with acoustics in mind, the space supports worship and a wide variety of musical events. The sloped floor and three-sided balcony provide excellent lines of sight. The series of twelve stained glass windows provide a contemporary interpretation of the stations of the cross. The liturgical furnishings were designed to compliment the surrounding worship space. The project architect, a church member, completed the project while a member of another architectural firm.
