

THE COMMUNITY CHURCH OF CHAPEL HILL

CHAPEL HILL, NC

The Community Church of Chapel Hill Project involved a major renovation of an existing modernist sanctuary and fellowship / education facility. Sanctuary work included complete interior and exterior renovations with new pews, chancel furniture, exterior glazing, audio / visual system, and interior finishes. A new administration suite was constructed, and the existing fellowship hall and education wing were fully modernized. The site improvements included new parking, a courtyard entry garden and landscaping. Sustainability improvements included upgraded electrical, plumbing and mechanical equipment, new windows and doors, and an increased thermal envelope.
