

TISE RESIDENCE
CHAPEL HILL, NC

The Tise Residence is located on a steep wooded site just south of Chapel Hill, NC. The 2,800 square foot home is located in a natural clearing and is sited to maximize views toward a creek that borders the property. The plan follows a curved circulation spine that connects a series of contained living spaces. This circulation path overlaps the adjacent spaces and shares space with each. The sense of containment is defined in various areas by dropped beams and curved ceilings. Windows are simple punched openings which focus on specific views while also affording great privacy. The building orientation, detailing and a compact plan contribute to superior energy efficiency.
